Testing of Circuit boards & electronic components

THS501

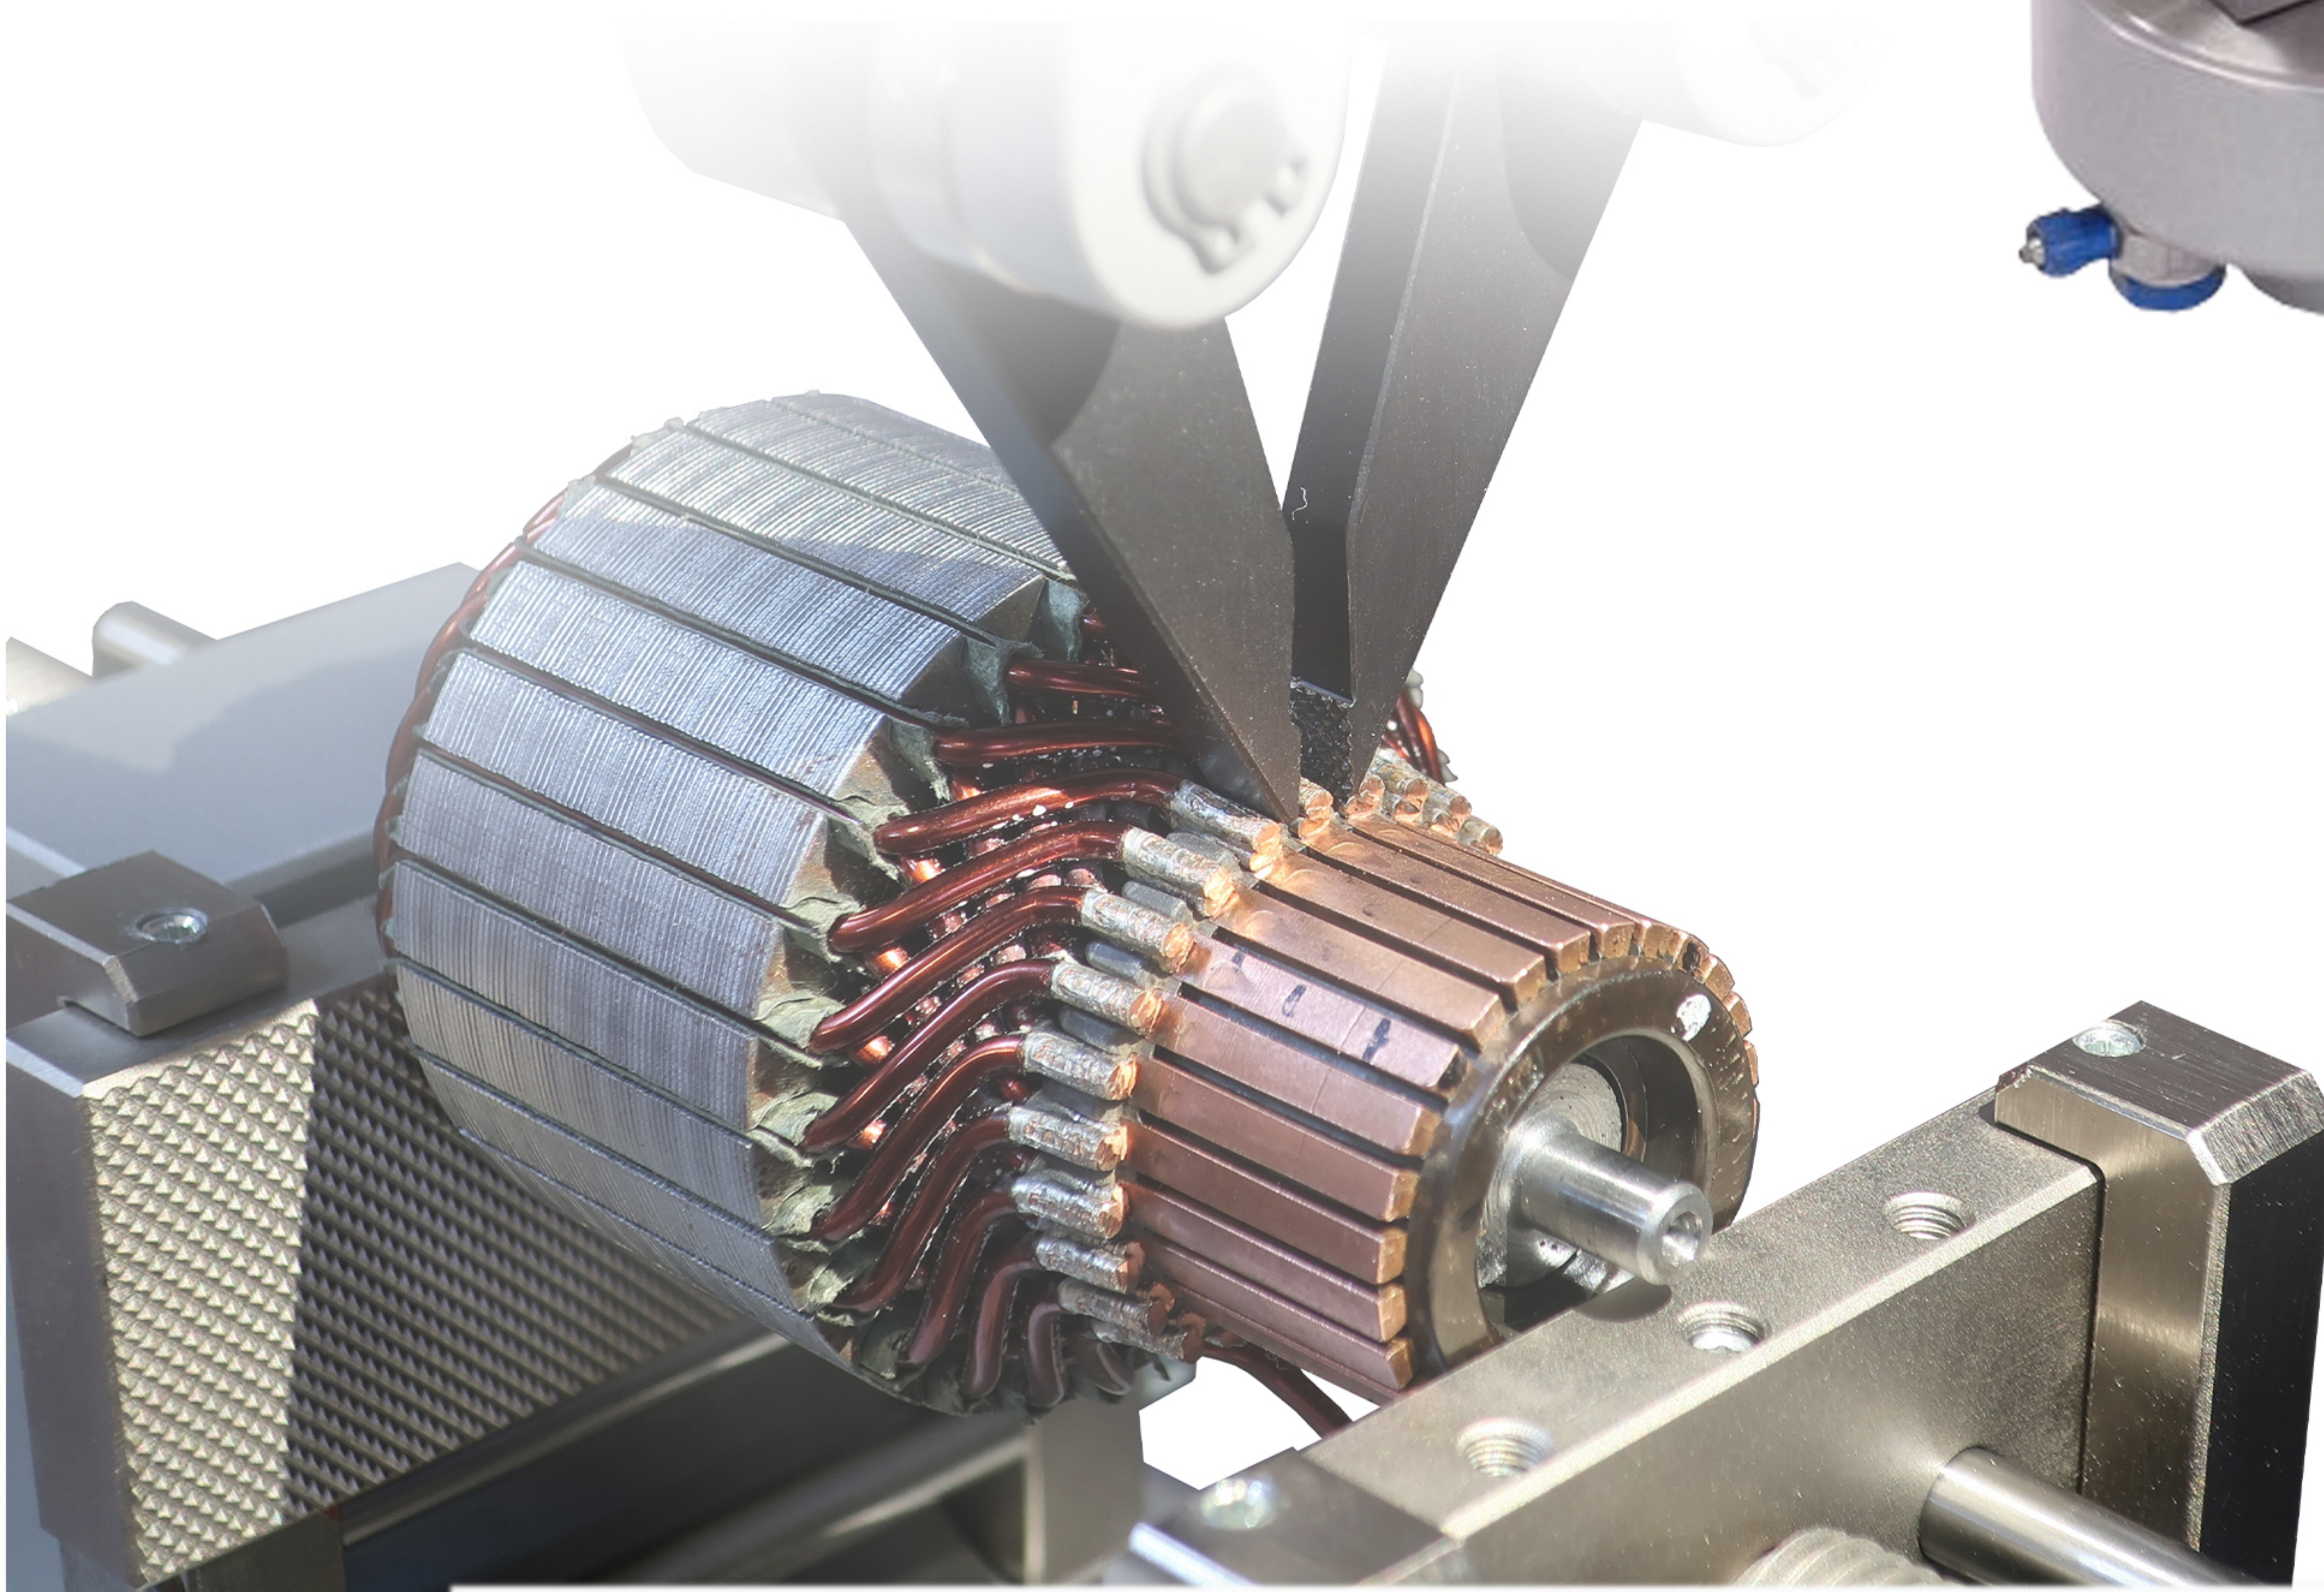

Pneumatic pincer grip

Used with Th240g-S100 for solder joint test

Jaws with TitanNitride coating available.

[See datasheet](#)

[Click to download all Images and Animations of the listed grips](#)

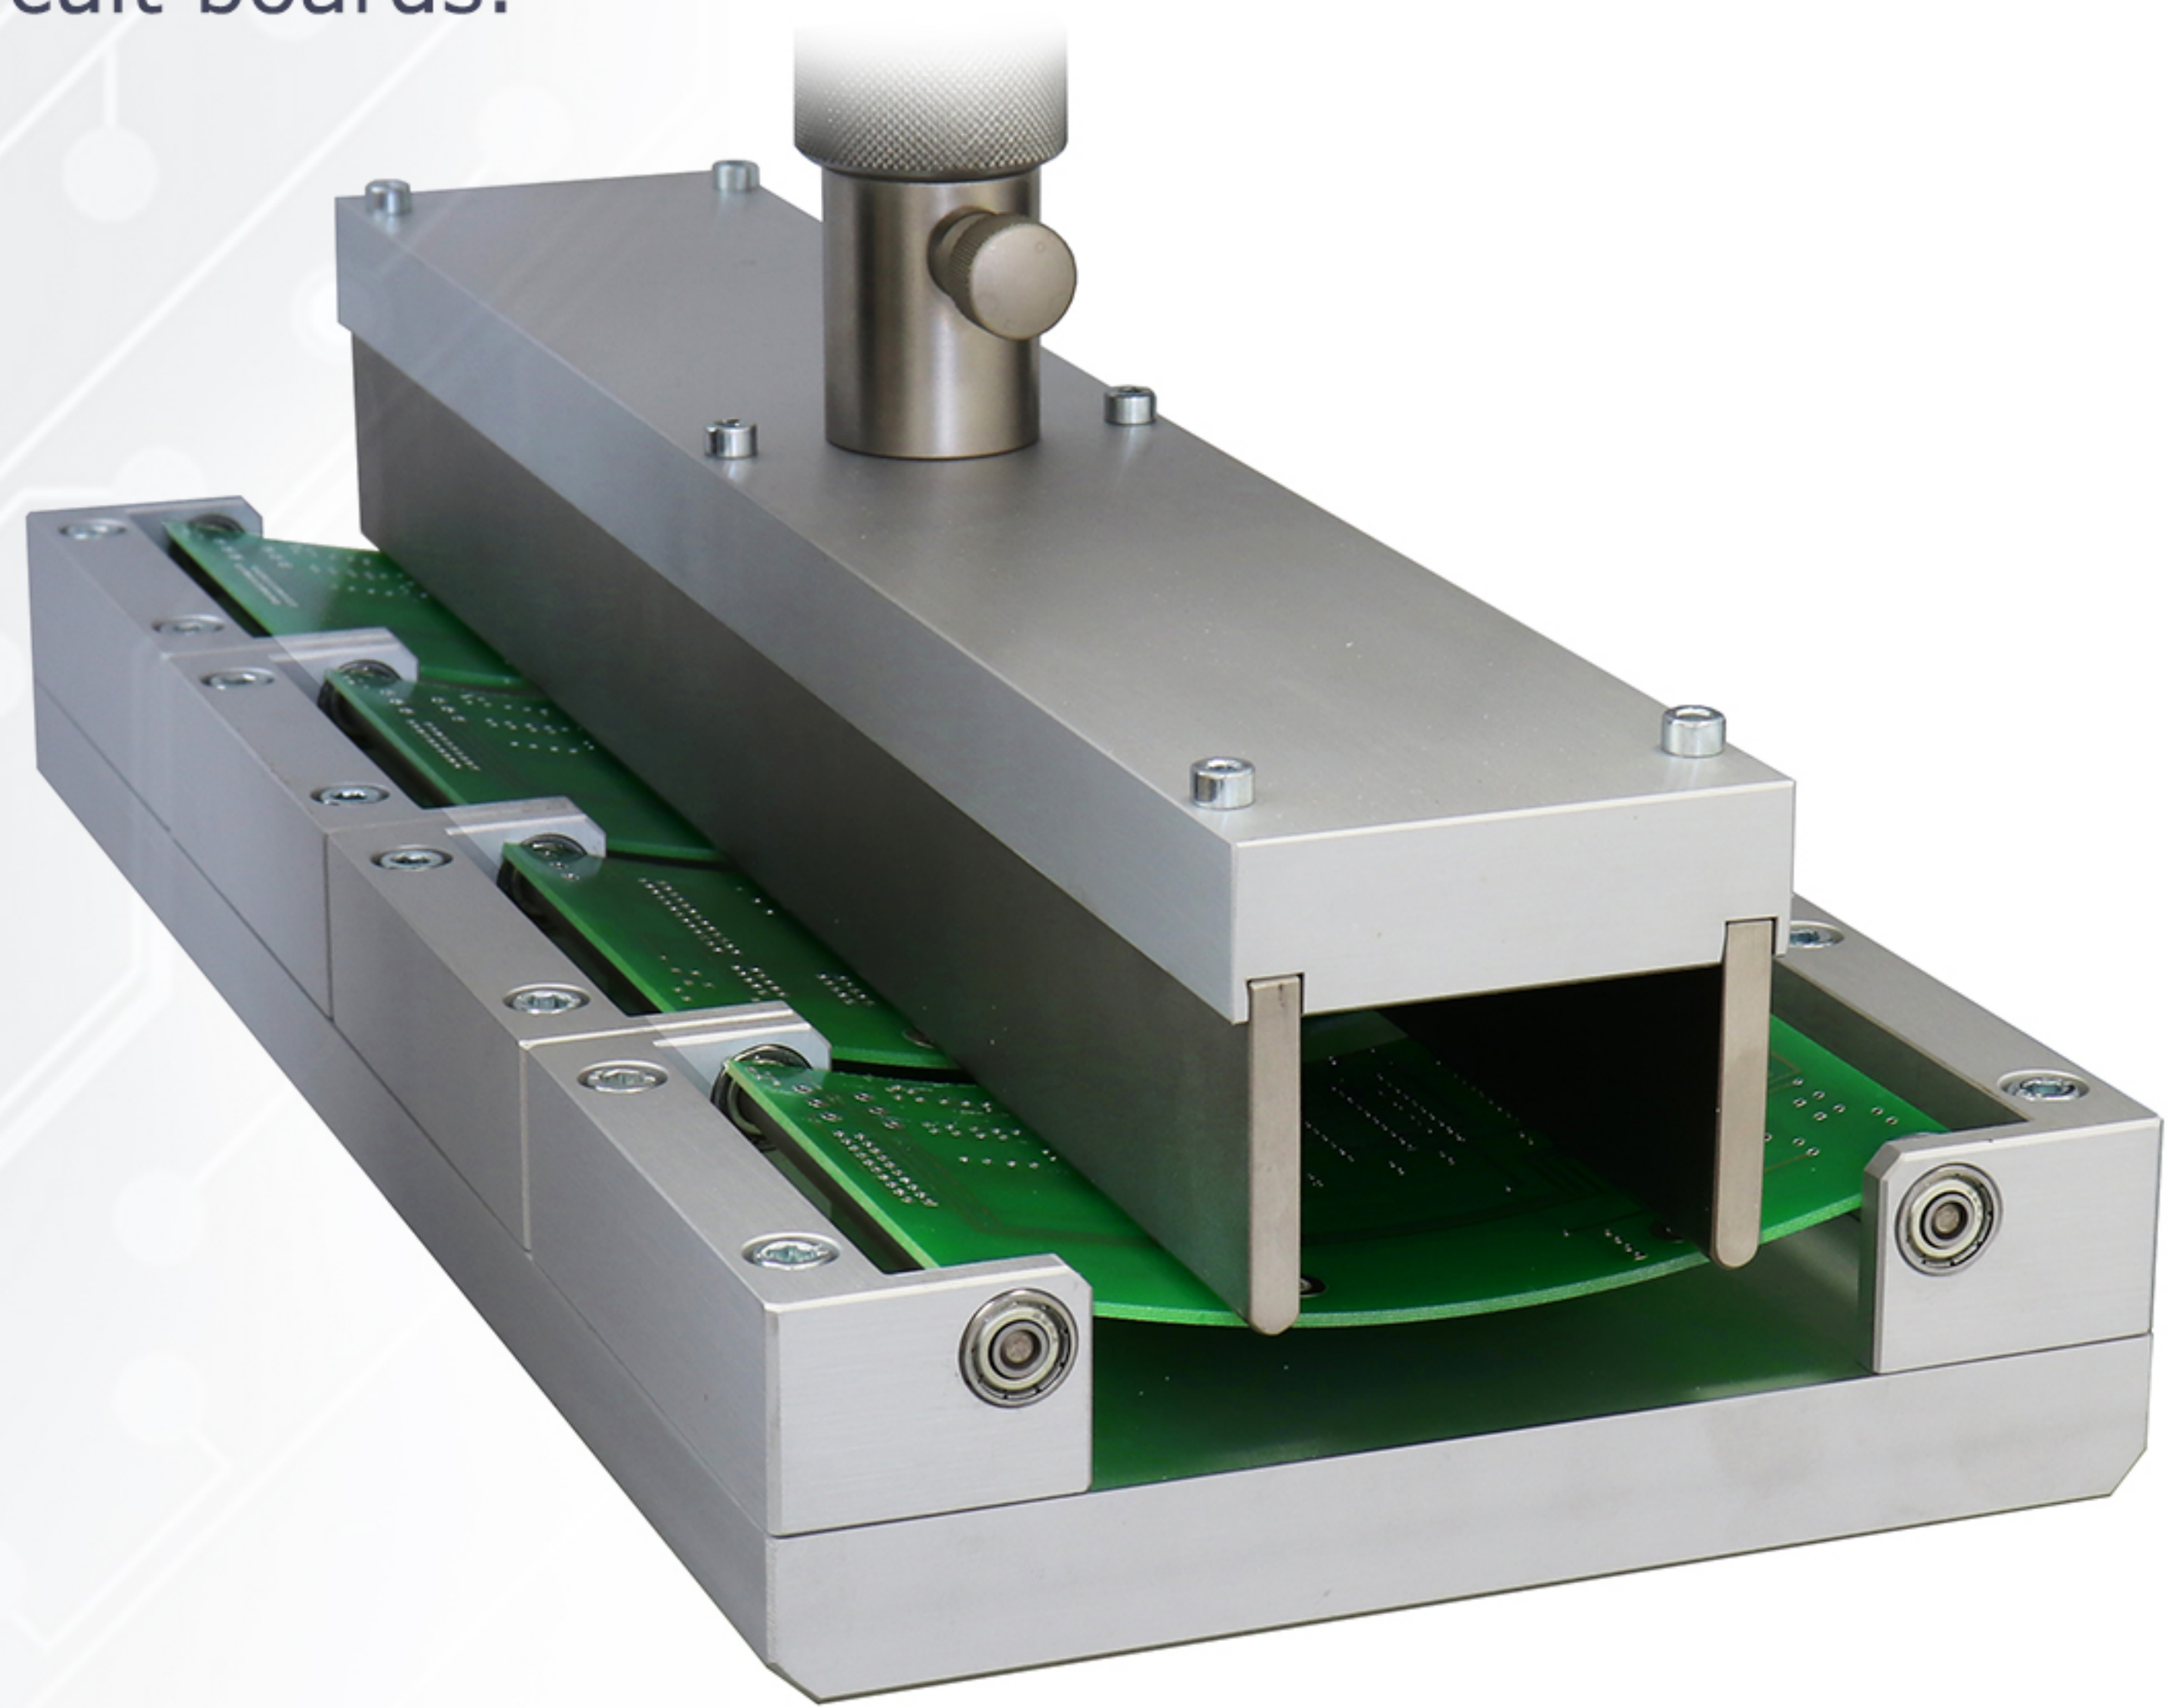

THS713-4P-4F-4x77

4-point fatigue bend test fixture for printed circuit boards.

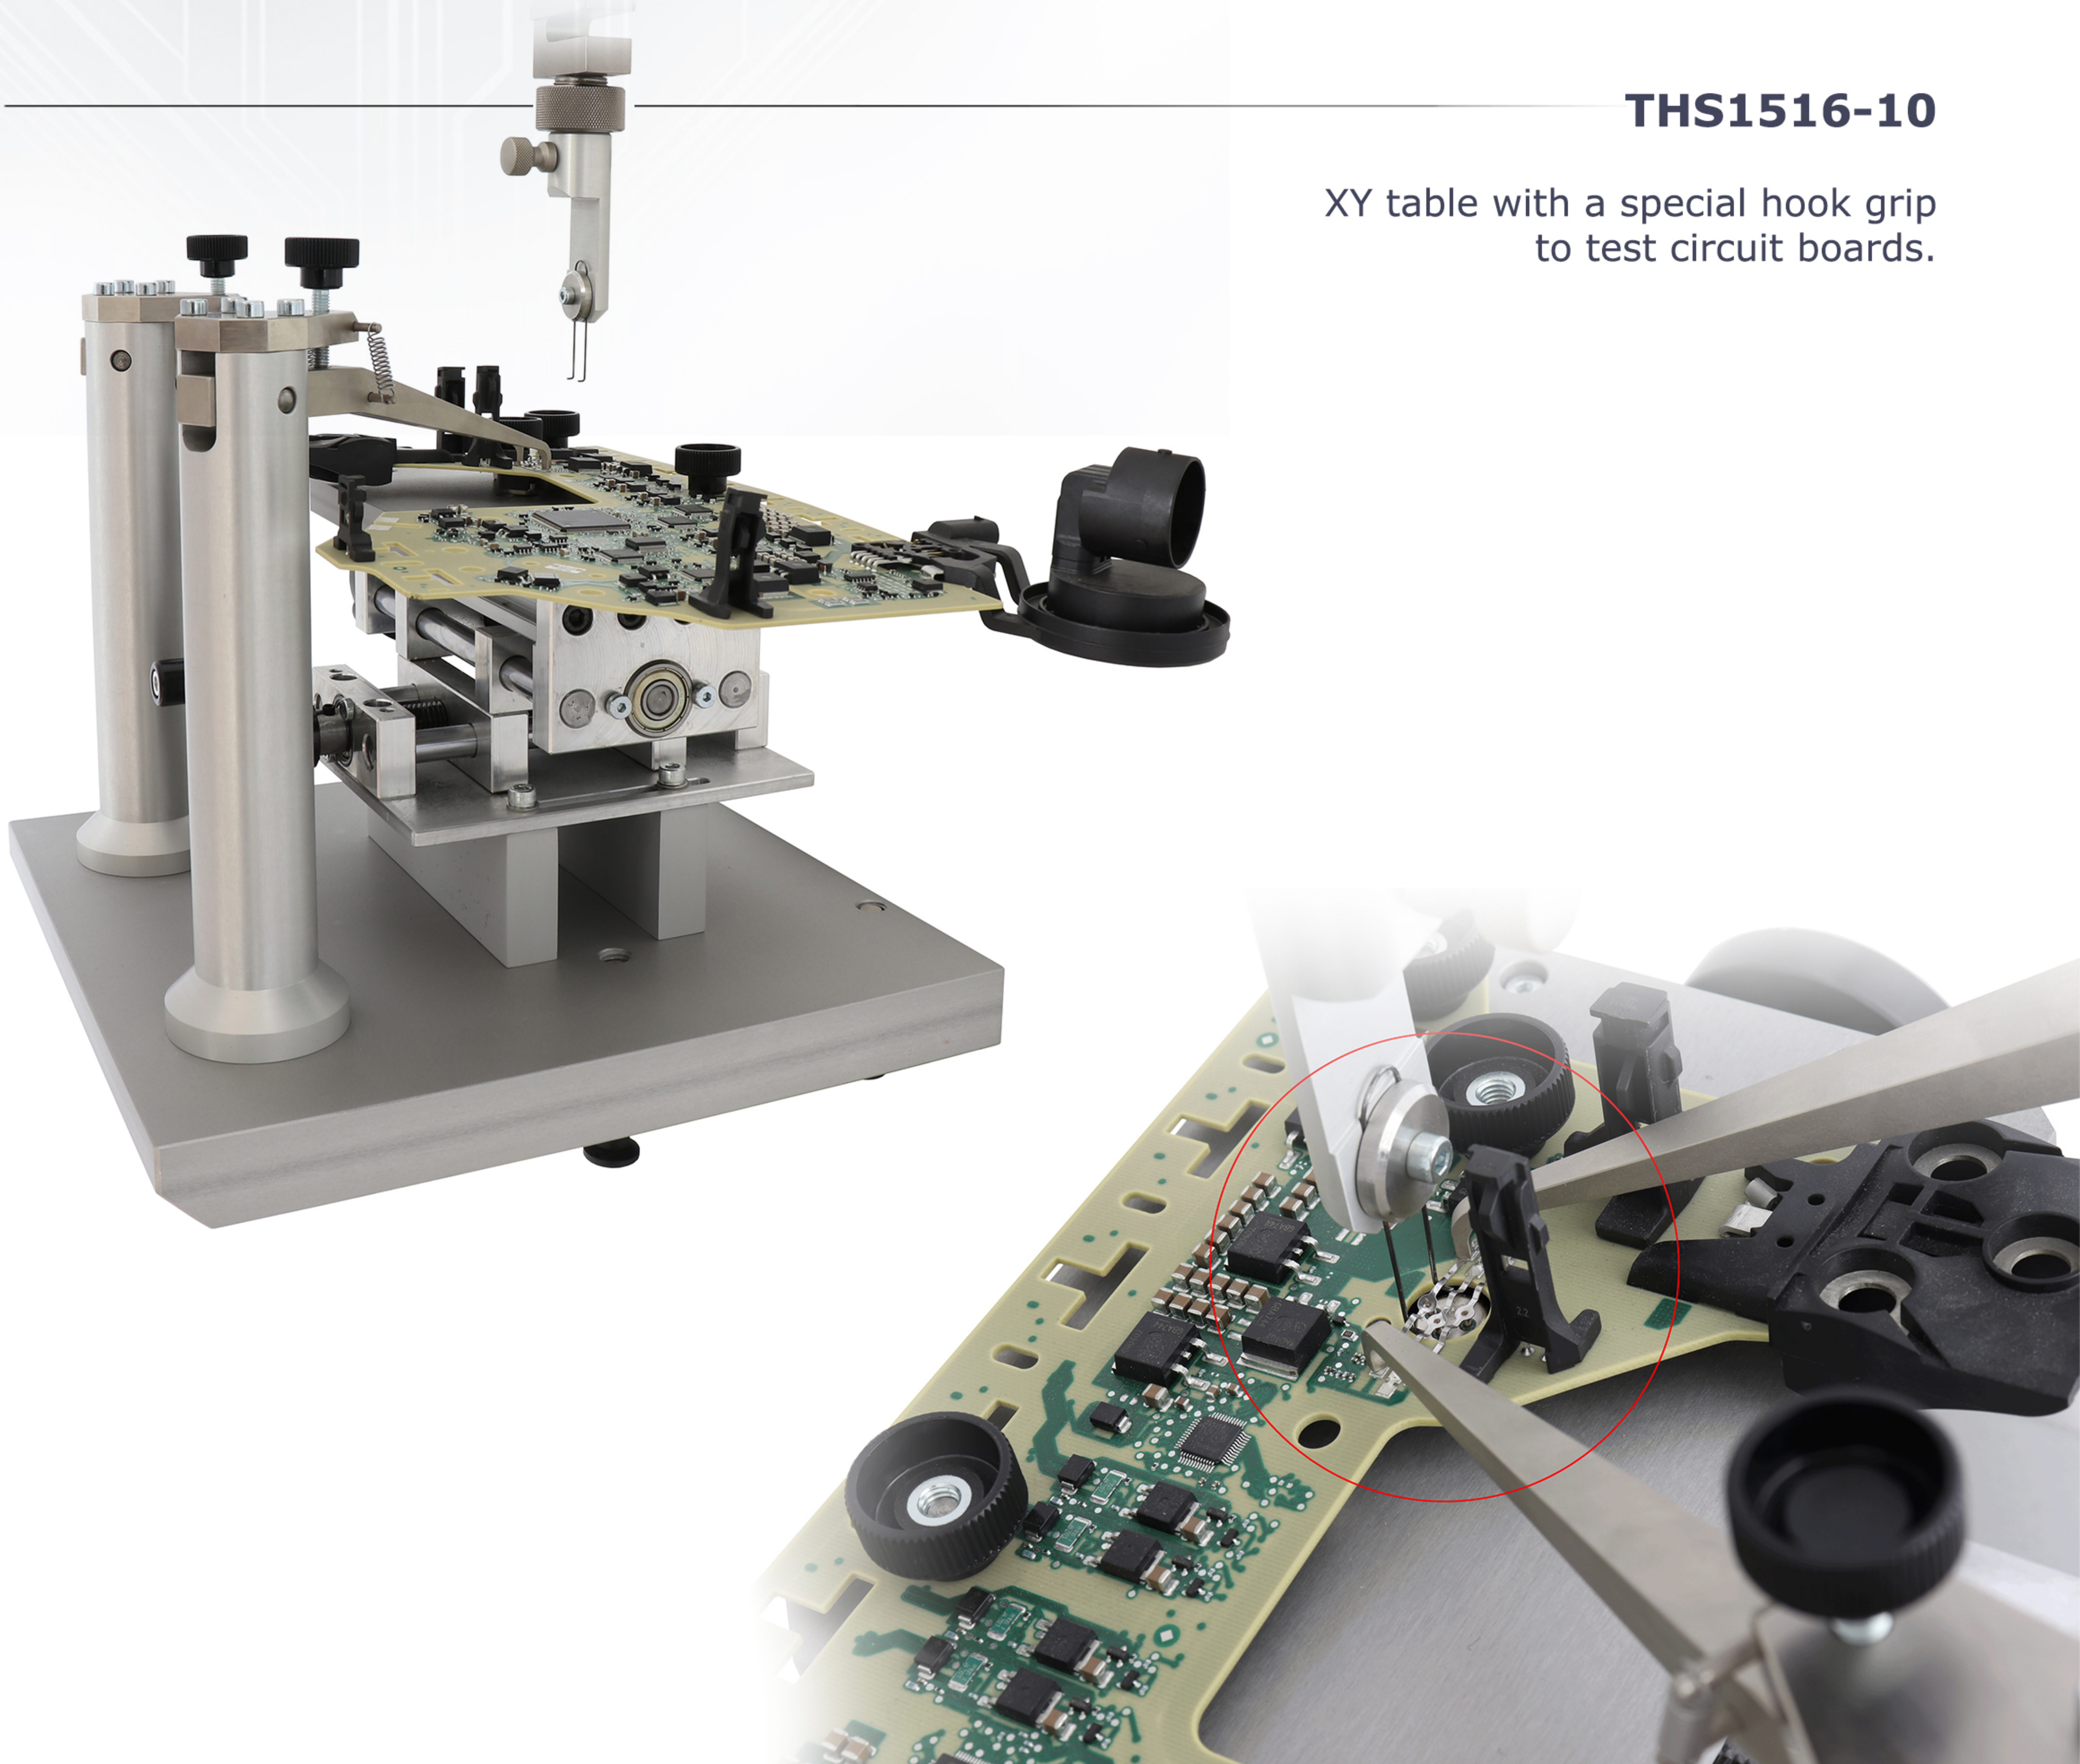

According to JEDEC JESD22B113.

4 specimens of the same size can be tested simultaneously.

THS1516-10

XY table with a special hook grip to test circuit boards.

THS581-3,2

Testing of pressure-sensitive adhesive-coated tapes used for electrical and electronic applications

According to ASTM-D1000 Fig. 9.

THS1583-V1

Special fixture to test joint strength of contact pins in solder holes of electronically boards
