

Chambers for Tensile Tester

TH 2700 *chamber for tensile tester*

*Self-supported two-fold body frame
Made of stainless steel 2mm 1.4301*

*Melted, polished and brushed from the outside
Heating power 2.3 kW (220 Volt/380 Volt)
Range of temperature -80°C + 280°C (optional 350°C / 500°C)*

Air circulation with a centric blower - mixing fan

*Front door contains 4 glass-platens;
Between inner glass platens are heating coils to remove
frosting of the glass – (optional door light, internal light)*

*Up and down hole has a Teflon guide tube outside, V2a inside
We add insert shells to reduce to smaller diameter for Pullrods
If we supply also Pullrods*

*External regulator self-optimizing 0.1°C Sika TLK96
(optional Omron RS232 or Eurotherm RS485, analog in and out)*

*19" Rack with 4 m cable and a solid plug on backside
Sensor PT 100*

*Frame to move chamber in and out of tensile tester
Chamber with adjustable feet is carried by the bearings and can be moved to
611 mm away.*

Heat up speed 15°C/Minute (from 20 to 80°C without grip)

Energy consumption of our standard TH2700 without grips

100°C	0,11	kWh/h
200°C	0,24	kWh/h
300°C	0,38	kWh/h

*Cooling requires liquid nitrogen, which is controlled by a
magnet valve on back side of chamber*

*Temporary frosting of the internal glass is occurred by opening the door and
can be solved by using heating coils*

*To come down to -70°C 4 kg liquid air is requested
To keep -70°C ~ 3 kg liquid air per hour is requested*

*TH 2700 standard size (delivery 14 days)
 Dimensions: inside 220x220x580 outside 360x480x766mm*

TH2700-Esk dto but with removeable wedge ports

*TK...-SX special versions of chambers with special dimensions
 Inside A x B x C (Width x Deepness x Height)
 1/3 prepaying required*

TK...-SX-Esk like Version SX but with removeable wedge ports

Options

*-Lit door light (heating coils alternative)
 -RS232 regulator with RS232
 -RS485 regulator with RS485
 -T350 elevated temperature range
 -WT heat exchanger
 -SSR special hinge
 -ESP Antireflex glasses
 -LHB long hole on back side for extensometer*

*Grips for
 chambers Suitable grips (TH175 THS321) you find on www.grip.de*

*THS521 Adapter made of stainless steel
 Tube with air pressure connector and Teflon tube*

Standard version on stock

Controller

Omron Standard Version **E5AN**-Q3MT-500-N

RS485

The universal regulators of the product line E5_N are available in 4 Standard-DIN-Formats. All constructions have lighted two-line display with good viewing angle. Each model of this line have 3-colored actual value indicating.

- 2-Point- or PID-Regulation
- relay output, hybrid Relay output, voltage output (for solid-state relay) or current output
- power options 24 V DC / 24 V AC or 100 to 240 V AC
- simply connection to industry-PC to configure, save and copy parameters
- simply setting and operation with the buttons on the front side
- clear diagnosis and alarm indication
- safety in use thanks to the password security and adjustable menu
- large selection of special functions and options
